The following data is required to create a new QC test group:

- cluster name
- test group name
- schema name for tables with test parameters (<test type>_test_set).

```
The format  qc_<first letter of firstname><lastname> is recommended. The default schema
name is QC.
```

- redshift username
- test action (warn | stop | email | wiki)
- email
- wiki link
- wiki page ID
- confluence space
